Israeli Occupation Kills Over 100 Scholars and Academics

The Government Media Office publishes a list of **over 100 names of scholars, academics, university professors, and researchers** who were killed by the Israeli army during the genocide war against the Palestinian people in the Gaza Strip.

The Israeli occupation army has managed to kill and assassinate over 100 scholars, academics, university professors, and researchers during the ongoing genocide war on the Gaza Strip for the eighth consecutive month. This act is a clear message aimed at completely eradicating scholars and researchers in the educational sector. Alongside this, the occupation has completely destroyed over 103 universities and schools, in addition to partially destroying 311 universities and schools.

We strongly condemn the assassination of scholars, academics, university professors, and researchers by the occupation. This group is distinguished within the Palestinian society in the Gaza Strip. We call on all universities and educational sectors worldwide to denounce this crime, which is part of the genocide crime.

We hold the Israeli occupation and the American administration fully responsible for this historic crime. The occupation kills and assassinates scholars, and the American administration is involved in the continuation of this genocide, contributing to a war that has claimed over 120,000 victims, including martyrs, wounded, missing, and detainees.

We also call on all free countries of the world and related educational organizations to condemn this historic crime and to exert pressure on the occupation to stop the genocide war against students, schools, universities, scholars, professors, and researchers, as well as the entire educational process.

Below is a list of over 100 names of scholars, academics, university professors, and researchers who were killed and assassinated by the Israeli occupation during the genocide war in the Gaza Strip:

1. Dr. Sufian Tayeh - President of the Islamic University in Gaza
